

CWI Container Irrigation Insert

The ultimate self-watering system that's perfect for all your favorite plants! Designed to fit most cylindrical and slightly tapered decorative pots, this innovative system has been crafted with over 30 years of experience in the industry. Featuring our proven vacuum-sensor watering system, the CWI ensures precise moisture control, automatically watering your plants when the soil starts to dry. With an oversize reservoir, you can enjoy refill intervals up to four times longer than typical hand watering, making it perfect for both interior and exterior planters. Plus, the unique sub-irrigation system ensures that your plants are watered from the bottom up, making it the most water-efficient irrigation option for pots and planters in the market. We have partnered with Tornesol siteworks USA to import innovative self-water sensors, patented by them. Invest in the CWI today and give your plants the love and care they deserve!
